Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1745

**ELECTRIC STORAGE BATTERY CONSTRUCTION AND METHOD OF
MANUFACTURE**

Examiner: Yuan S.N. 10/666,861 Art Unit: 1745 March 9, 2007

Detailed Action

1. The Applicant's amendment filed on January 2, 2007 was received. Claim 66 was amended.
2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action issued on November 13, 2006.

Double Patenting

3. Claims 1-9,66-71 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-9 of prior U.S. Patent No. US 6,670,071 B2. This is a double patenting rejection. In the instant case, the mandrel is fitted around the elongate pin, therefore, the mandrel has to have a cavity within to accommodate the pin, i.e., the mandrel is hollow. In addition, any surface of the first electrode strip that is in contact with the pin can be defined as the "inner end" as recited in the '071 patent.

With respect to claim 66, the weld that connects the mandrel to the pin in '071 patent is considered as a crimp that connects the mandrel to the pin.

Response to Arguments

4. Applicant's arguments filed on January 2, 2007 have been fully considered but they are not persuasive.

Applicant's principal arguments are

The recitation "mandrel for mechanically reinforcing said pin" in the '071 patent is not required in the instant claim 1.

In response to Applicant's arguments, please consider the following comments.

Claim 1 of the instant disclosure recites "an elongate mandrel fitted around the pin". Furthermore, claims 67 and 68 recite "the mandrel includes a tube" and "the pin is positioned in an interior of the tube", respectively. It is evident that the pin is strengthened (reinforced) by the additional assistance from the elongate tube that fits longitudinally around the pin. Therefore, the conflicting claims in the patent fall entirely within the scope of the examined application claims. The double patenting rejection is proper and thus maintained.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1745

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
